

MineralCheck

A comprehensive trace-element monitoring program

THIS FORM MUST GO WITH THE STOCK TRUCK DRIVER TO THE MEAT WORKS. Where possible, please also email this form to the meat works (see reverse side of this form).

Vet's name:
Vet clinic:
Vet reference number:

Owner name:
Farm name:
Postal address:
Telephone:
Agribase/AHB number:

Trucking Company:
Name of Works:
Location/Code of Works:
Date of arrival at works:

Breed:	
Age:	Sex:
No. animals sent:	
Animal IDs / tags:	

Farmer's instructions:

Please tick the trace elements required. Due to the variability of liver copper, the recommended minimum sample size is now 10 which will provide a more accurate indicator of herd copper status. For other trace elements, a minimum of 5 samples is recommended. If you require more or less to be sampled please write the new number in the box. It is advisable to discuss this with your veterinarian first.

Cattle (beef or dairy)	<input type="checkbox"/> ≥10 x Copper	<input type="checkbox"/> 5 x Selenium	<input type="checkbox"/> 5 x Cobalt	<input type="checkbox"/> 5 x Zinc
Sheep or lambs (age required)	<input type="checkbox"/> ≥10 x Copper	<input type="checkbox"/> 5 x Selenium	<input type="checkbox"/> 5 x Cobalt	<input type="checkbox"/> 5 x Zinc
Deer	<input type="checkbox"/> ≥10 x Copper	<input type="checkbox"/> 5 x Selenium		

The results of these tests will be sent to your veterinarian. Your vet will be able to provide an interpretation and recommendations from your mineral check results and will invoice you for the complete service.

AsureQuality staff:

Please sample one piece of liver from 10 separate animals (unless there are fewer than 10 animals in the line from the farm). For disease assessment please assess the total stock line of livers for the following:

Number in line:	Kill date:		No. sampled:		Works ME No:
	Nil	<10%	10-50%	>50%	
Sheep / lambs / cattle / deer					Comments:
Liver fluke					
Facial eczema					
Vaccination lesions					
Pneumonia/Pleurisy					

Awanui Veterinary thanks AsureQuality and the Meat Works for their co-operation in providing these samples.

Mineral**Check** trace element monitoring is a strategic management tool that can help you maximise production and minimise expenditure by identifying the trace element status of your animals. While information can be obtained by blood sampling and liver biopsies taken from live animals, liver sampling is an effective and convenient method when animals go to the meat works. The liver sampling is available through all the meat works and the service also includes a visual assessment of the livers for liver fluke, liver eczema and abscesses.

Procedure:

- A copy of this form **must** be completed and given to the stock truck driver to deliver to the meat works with your declaration card/trucking documents.
- Please ensure a copy is emailed to AsureQuality at the meat work premises well before you send the stock.
